Does Kuwait need solar power in 2035?

Despite some progress in supporting solar generation, in the Business-as-Usual Case, the share of renewables in total primary energy demand remains low in 2035, only 3%. Electricity generation capacity in Kuwait increases by over 13.2 gigawatts over the Outlook period, reaching 32 GW in 2035, a 70% increase over capacity in 2018.

What is Kuwait Energy Outlook?

The platform came in the form of Kuwait Energy Outlook, an energy policy platform supporting efficient coordination between the energy sector stakeholders that assures coordination and robust development among them to realize the country's domestic and international responsibilities operated and managed by national capacities.

What is the future of Kuwait's Electricity sector?

The Ministry of Electricity and Water estimates that reserve margins could drop to 8% by 2020. Kuwait plans to increase base-load electricity generating capacity to 32 GW by 2035 (see Chapter 2). Until very recently, the Ministry of Electricity and Water was solely responsible for the development of the electricity sector.

How much energy does Kuwait use?

Kuwaiti citizens account for 30% of the total population, but they use about two-thirds of the total amount of energy consumed in the country. Average temperatures hover in the upper 40s Celsius during summer months. Over the past few years, these "summer" months have extended from April to October.

Will Kuwait increase the share of renewables in energy demand?

Kuwait has a soft target of increasing the share of renewables in total energy demand to about 15% by 2030, up from less than 1% today. The potential for increasing the share of renewables in the electricity generation mix in Kuwait is huge, given its substantial solar and wind resources. Central Statistics Office,

Is Kuwait facing a changing energy world?

Kuwait, like all oil-producing countries, is facing a changing energy world today. Shifting supply, demand and technology trends have ushered in an energy world where oil-price volatility and market uncertainty are the defining features.
