How will Liberia achieve universal access to electricity by 2030?

The country will need to invest heavily in energy infrastructure to achieve universal access to electricity by 2030. The primary energy sources in Liberia are traditional biomass fuels such as firewood and charcoal, which account for more than 80% of the country's total energy consumption [5,12,13].

Who is IBV Energy Partners?

ibV Energy Partners is a leader in the development and operations of integrated solar + storage power plants across the United States. We are focused on the utility-scale segment and partner with wholesale power providers and corporate entities to address their resource planning process and long-term decarbonization goals.

How can Liberia improve energy security?

One strategy is to diversify the energy mix by increasing the share of domestic renewable energy sources, such as solar and wind power, for electricity generation. By harnessing these indigenous and sustainable energy resources, Liberia can decrease its reliance on imported fuels and enhance its energy security.

Will Liberia get a 20 MW power supply in 2020?

In addition, the government signed a Power Purchase Agreement with a solar energy company to provide the country with ≥ 20 MW of electricity in 2020. Despite these efforts, much work remains to be done to improve access to reliable and affordable energy in Liberia.

How does Liberia benefit from international support?

Liberia benefits from international support and investments in energy access projects. The United Nations Development Programme (UNDP), the African Development Bank (AfDB), and the World Bank are among the organizations that provide financial and technical support to Liberia's energy sector.

What energy sources does Liberia use?

Liberia also utilizes other energy sources on a smaller scale. These include small-scale renewable energy systems such as solar and biomass. However, the contribution of these sources to the overall energy mix in Liberia is limited. Abundant and clean energy sources, reducing reliance on fossil fuels.
