Who is RGA Germany?

RGA Germany opened a branch office in 2008 to serve clients throughout the region and assembled a team with deep expertise. We can help bring a new product to market, improve the performance of an existing product or better manage risk and capital through financial solutions. Managing Director

What is RGA used for?

Contamination Control: The RGA can be used to pin-point unexpected and unwanted substances in the system. These contaminants can come from a variety of sources and the RGA software contains a library of known spectra that can be used to help identify extraneous or unknown substances. Process Control: RGA information can be used for controlling

What is RGA central?

RGA Central is a convenient client portal that provides a single point of access to exclusive applications and insights. At RGA, we are eager to speak with clients and counterparties. Contact us to learn more about the resources, solutions, and services available.

What services does RGA offer?

RGA also offers: AURA NEXT, a decision-management platform powered by RGA's underwriting and analytics expertise. Realize the significant benefits of fast, flexible, and reliable automated underwriting. The Global Underwriting Manual, a comprehensive and easy to use resource.

What are the RGA detector limits?

Detection limits: There are two types of RGA detectors: the Faraday Cup (FC) and the Electron Multiplier (EM). The Faraday Cup is a simple metal plate or cup-shaped electrode that yields a minimum detectable partial pressure (MDPP) of 3×10^{-13} Torr. The FC has a maximum operating temperature of 250°C (200°C for Compact sensors).

Is RGA a good company?

RGA has one of the most experienced underwriting teams of any reinsurer, and the company is the worldwide leader in facultative underwriting, receiving more than 8 million cases since 1979. RGA also offers: AURA NEXT, a decision-management platform powered by RGA's underwriting and analytics expertise.

Transceptor APX is the market-leading Residual Gas Analyzer (RGA) process monitoring system in the semiconductor industry upgraded for the latest harsh processes such as e.g. ALD, CVD, PVD, and Etch.

A residual gas analyzer (RGA) is a small and usually rugged mass spectrometer, typically designed for process control and contamination monitoring in vacuum systems. When constructed as a quadrupole mass analyzer, there exist two implementations, utilizing either an open ion source (OIS) or a closed ion source (CIS).

Liechtenstein rga systems

RGA systems based on a modular principle for every testing requirement. Every test task is different. Our team of experts accesses the full range of Pfeiffer Vacuum products and uses them to configure the system that best suits your requirements.

The AC Hi-Speed RGA system characterizes: C1 - nC6, C6+ hydrocarbons; Inert gases: nitrogen, hydrogen, helium, oxygen, carbon monoxide, carbon dioxide; Hydrogen sulfide; BTEX (benzene, Toluene, Ethylbenzene, Xylenes), using the RGA extended method with a ...

The RGA systems are supported with a real-time software package that runs on Windows OS computers. The intuitive graphical user interface allows measurements to be made quickly and easily. Data is captured and displayed in real-time or scheduled for acquisition at a given time interval for long-term data logging. Multiple spectral data and ...

Hidden RGA series systems are designed for residual gas analysis, gas analysis and process monitoring applications including leak detection, trend analysis and vacuum survey. The HAL 101 X RC is a specific analyser with additional features for real time quantitative analysis of complex gas and vapour mixtures in fusion applications and harsh ...

our product range of residual gas analysis solutions (RGA solutions) to increase the value proposition for our customers and provide a higher value chain solution. Modular RGA systems for any testing need Besides offering mass spectrometers, vacuum pumps, chambers and more as single components we will now

RGA is building a legacy of innovation in Germany, Austria, Switzerland, Liechtenstein, and Luxembourg. RGA Germany opened a branch office in 2008 to serve clients throughout the region and assembled a team with deep expertise.

Hidden's 3F Series 1000 RGA mass spectrometers with pulse ion counting detection system and integral signal gating enable effective molecular beam analysis. Integral delay timers provide for automatic acquisition of foreground and background signal in ...

A residual gas analyzer (RGA) was developed for the Material Science Laboratory - Vacuum Gas System (MSL-VGS) onboard the International Space Station ISS to determine krypton leakage ...

Liechtenstein rga systems

Calibration systems within IND-12 Project o PTB will develop a dedicated "orifice flow" calibration facility for QMS calibration - system will enable mixing of three gasses o IMT plans to build a pressure divider system o INRIM, CMI and CEM will calibrate QMS on their existing dynamic expansion primary systems

The RGA electronics module, which incorporates a "smart sensor" design, interprets the output of the sensor for display with the system software and an external computer. This system software is used for process monitoring, statistical process control, and maintenance procedures like mass calibration. wHy use an RGa?

A residual gas analyzer (RGA) was developed for the Material Science Laboratory - Vacuum Gas System (MSL-VGS) onboard the International Space Station ISS to determine krypton leakage in sealed cartridges

Prestation de maïeutique, depuis la création de plan d"actions jusqu"à l"élaboration de stratégie d"entreprise. Il autorise l"identification des objectifs et des actions à conduire, une analyse SWOT, une planification, l"évaluation des effets des actions, la définition de plan stratégique, de schéma directeur, la proposition de nouveaux modes d"organisation, d"analyse de ...

Hidden's 3F Series 1000 RGA. mass spectrometers with pulse ion counting detection system and integral signal gating enable effective molecular beam analysis. Integral delay timers provide for automatic acquisition of foreground ...

Analyzer (RGA) for monitoring process chemistries and con-tamination. This IPM employs an open-source RGA mounted on the transfer chamber which is connected to the FabGuard® Analysis System. Sensor operation is integrated with produc-tion tool operation (communicating with FabGuard via SECS or HSMS), allowing a single RGA to monitor the transfer

· Transpector APX is the market-leading Residual Gas Analyzer (RGA) process monitoring system in the semiconductor industry upgraded for the latest harsh processes such as e.g. ...

Ethernet cable needed to connect the RGA to a laptop for communication. -- 10ft. cable included with KJLC Element RGA. 7m and 15 m cables available in accessories table. Connecting Hardware (Included) Hardware used to connect the KJLC Element RGA to the chamber. -- DN40CF gasket, nuts, and bolts are included with the KJLC Element RGA.
