

Lifang Fengling Power Station

Is China's Fengning power station the world's largest hydro power plant?

China has set a new global benchmark in the global hydropower sector with the completion of the Fengning Pumped Storage Power Station, the largest of its kind in the world. China's Fengning Station: World's Largest Pumped Hydro Power Plant Sets New Global Benchmark

How big is China's Fengning pumped storage power station?

China has set a new global benchmark in the global hydropower sector with the completion of the Fengning Pumped Storage Power Station, the largest of its kind in the world. Located in Hebei province, this cutting-edge facility has a total installed capacity of 3.6 GW and is operated by the State Grid Corporation of China (SGCC).

Where is Fengning pumped storage power station located?

The Fengning pumped storage hydropower plant in Hebei province(courtesy: State Grid Corporation of China) China has set a new global benchmark in the global hydropower sector with the completion of the Fengning Pumped Storage Power Station,the largest of its kind in the world.

What is Fengning pumped storage power plant?

The Fengning pumped storage hydroelectric facility will be connected with the Beijing-Tianjin-North Hebei grid. The 3.6GW Fengning pumped storage power station under construction in the Hebei Province of China will be the world's biggest pumped-storage hydroelectric power plant.

What is Fengning pumped storage facility?

The Fengning pumped storage facility will operate as a peaking power plant for the safe and stable operation of the Beijing-Tianjin-North Hebei grid while balancing the intermittent power supply from large wind and solar parks in northern Hebei and Inner Mongolia regions.

When was Fengning power station built?

Construction of the Fengning station began in June 2013, with the Gezhouba Group securing the main contract to build the power station in April 2014. The project was constructed in two phases, each involving six 300 MW reversible pump-turbine units, together delivering the full 3.6 GW of installed capacity.
