

Lower 48 energy bess ltd Syria

Who is lower 48 energy Bess?

Lower 48 Energy BESS is a UK based end to end Battery Energy Storage Systems developer focusing on developing large scale, strategically located BESS assets. We are motivated to rapidly develop an operational portfolio that is of importance to the UK's electricity grid.

Who owns lower 48 energy?

We also work with tier-one suppliers and partners to ensure sustainable and high-quality development. Lower 48 Energy is majority owned by Castleton Commodities International LLC (CCI). CCI completed the transaction in December 2023 with the goal to develop the company into one of the largest storage platforms in the UK.

What does lower 48 energy do?

Lower 48 Energy works closely with suppliers, investors, and counterparties on BESS projects, leveraging market, engineering, technical, commercial and development expertise. Climate change will be one of the most economically impactful events in human history.

Who supports lower 48 energy?

Lower 48 Energy are supported by Azets, one of the UK's leading Accountancy practices with over 7,500 staff. We have committed to our Board that our accounts will be Full Audited Accounts.

How much energy can a Bess project produce?

The BESS project would be able to store and supply 290,000 MWh of renewable electricity annually (which is equivalent of supplying 100,000 homes) and in the process displace ca. 77,000 metric tons of CO₂ from the atmosphere.

How does lower 48 energy engage with the community?

Lower 48 Energy are committed to engaging with the community and other stakeholders at the earliest stages of the project's development. In this way we will ensure that any disruption is kept to a minimum. To find out more about our engagement proposals please visit 'The Community'.

Lower 48 Energy has received and accepted a National Grid Electricity Distribution (NGED) grid connection offer to energise a 99.9 MW / 199.8 MWh BESS project. The project site is located immediately close to the Shrewsbury Substation which offers great savings in terms of lower cost of connection and cabling.

Lower 48 Energy are proposing to develop a 100 MW, 2hr BESS on a site near to the existing Shrewsbury substation. The 100 MW of BESS will consist of containerised Li-ion battery packs ...
