NEWARK, CA -- August 19, 2020 -- Lucid Motors, which seeks to set new standards for sustainable transportation with its advanced luxury EVs, today announced the Lucid Air will be the fastest charging electric vehicle ever offered with the capability to charge at rates of up to 20 miles per minute. For owners charging their Lucid Air in real-world conditions on the road, that can ...

Lucid, considered one of the largest private midstream operators in the Permian, has 2,000-plus miles of pipeline in operation, 150,000 hp compression and 1.2 Bcf of gas processing capacity in ...

Battery storage is urgently needed for the renewable energy transition, and is expected to play a huge role in Japan's future power system. Businesses see battery storage as a complement to their renewable energy strategy, and a strong opportunity to improve their bottom line while accelerating their path to decarbonization.

Lucid Energy Group is the largest privately held natural gas processor in the Permian Basin, providing the full range of gas midstream services to more than 50 customers in New Mexico and West ...

Lucid Motors Inc., the electric-vehicle startup that has yet to build a production car, is following Tesla Inc.'s footsteps into the energy-storage business. The Newark, California-based company is developing home batteries -- similar to Tesla's Powerwall -- and utility-scale devices, Chief Executive Officer Peter Rawlinson said in an interview.

Following Panasonic's announcement of battery production expansion in Kansas, US, the Japanese battery maker announced on Dec 13 that it will supply EV batteries for Lucid Motors' luxury EVs ...
