

# Luxembourg solar energy kit for home

How do solar panels work in Luxembourg?

In Luxembourg, the main model is that of self-consumption with sale of surplus. To put it plainly: owners of solar panels consume the energy produced by their panels directly. If there is any electricity left over, it is sold back to the grid at a rate set by the government. This system has a number of advantages:

How can Luxembourg encourage the adoption of solar energy?

To encourage the adoption of solar energy, the Luxembourg government has set up a range of grants and subsidies that make the installation of solar panels even more attractive. The programme Klimabonus offers to reimburse up to 62.5% of the cost of the photovoltaic installation for self-consumption contracts.

How to install solar panels on your roof in Luxembourg?

Conditions for installing solar panels on your roof in Luxembourg The best way to install solar panels in Luxembourg is to analyse three key factors: Roof pitch : The ideal angle for solar panels in the region is between 25 and 35 degrees to the horizontal, optimising exposure to the sun's rays all year round.
