Who uses Prima power Laserdyne?

Medical, aerospace, turbine engine, automotive, and general manufacturing companies around the world look for Prima Power Laserdyne systems. In addition, the LASERDYNE Applications Group (TM) can develop and provide a process optimized for the application.

How does Prima power Laserdyne use MTConnect#174;?

Prima Power Laserdyne uses MTConnect#174; for streaming of system and process parameters along with key machine activity to provide real-time information to the facility or operations management system.

What are the benefits of a Laserdyne #174; machine?

LASERDYNE#174; has a strong reputation for consistently and quickly manufacturing quality components. Shorter cycle times. Higher overall equipment efficiency due to reduced downtime and maintenance. Less resources are dedicated to maintaining the machines. More efficient use of floor space for the total working envelope of the machine.

Prima Power announces the product introduction and availability of the LASERDYNE#174; 811 - designed to address the next generation of laser processing challenges. The LASERDYNE 811 machine employs the most current hardware and software components for flexible precision laser processing in an affordable compact platform.
