What is the power Africa Madagascar mini-grid development grant?

Power Africa launched the "Power Africa Madagascar Mini-Grid Development Grant" to bridge the financing gap and support implementation of new mini-grid projects as well as expansion of existing mini-grids to new customers.

Who won power Africa's mini-grid grants?

Power Africa, through the United States Agency for International Development (USAID), awarded grants totaling \$1.2 million to mini-grid developers lighting up more than 5,200 households and businesses in rural Madagascar. The winners are: Autarsys Madagascar, Henri Fraise Fils & Cie, and Hydro Ingénierie Etudes et Réalisations (HIER).

What are the natural resources of Madagascar?

Madagascar has substantial natural resources, including hydro, wind and solar. Diesel is prominent, resulting in localized costs that can run as high as \$0.70-0.80/kWh. High tariff rates result in low collection rates, and subsequent plant failures due to unfunded maintenance. The utility requires ongoing financial support.

RePower, formally known as "Improving Renewables Penetration Through Plug and Play Microgrids," aims to enhance the penetration of renewable energy in rural communities in Madagascar, Niger, Senegal and Ghana. Nearly 800 million people, most of whom live in sub-Saharan Africa, do not have access to electricity.
