

Malaysia dormant energy

What is Malaysia's energy transition roadmap?

Malaysia's energy transition roadmap marks a significant shift towards a more sustainable and clean energy future. With the government's commitment to reducing carbon emissions and increasing the share of renewables in its energy mix, there is a growing opportunity for innovative solutions and technologies to thrive in the market.

What is Malaysia's Energy Transition outlook?

It also presents sector-specific technological pathways and investment opportunities that will help Malaysia to accelerate its energy transition. The Malaysia energy transition outlook provides a comprehensive, renewables-focused, long-term energy pathway for the transition to a cleaner and more sustainable energy system in Malaysia.

What is Malaysia's solar power potential?

According to IRENA, Malaysia has the potential to install 153 GW of solar energy by 2050, supported by 782 GWh of storage. Tapping into this potential will help Malaysia reach its renewable targets. Malaysia Solar Power Potential, Source: IRENA

What is Malaysia's energy mix?

According to Global Data, coal, oil, and gas account for 75% of the country's current power mix. As of 2024, IRENA notes renewables account for just 5% of Malaysia's energy mix. Hydropower and solar make up the majority. However, according to government data, as of the end of 2020, renewable energy sources accounted for 23% of national power.

Is Malaysia a good place to install solar power?

In fact, its solar power conditions are some of the best in Southeast Asia (SEA), as it is located near the equator. According to IRENA, Malaysia has the potential to install 153 GW of solar energy by 2050, supported by 782 GWh of storage. Tapping into this potential will help Malaysia reach its renewable targets.

What percentage of Malaysia's energy supply is renewable?

As of 2024, IRENA notes renewables account for just 5% of Malaysia's energy mix. Hydropower and solar make up the majority. However, according to government data, as of the end of 2020, renewable energy sources accounted for 23% of national power. Total Energy Supply (TES) by Source, Malaysia 1990-2020, Source: IEA
