What is the Maldives solar project?

The Maldives solar project is a 36 MW solar power project and 50 MWh of battery energy storage solutions development across various islands in the Maldives. It also includes grid modernization for the integration of variable renewable energy with the grid, which will be financed under the proposed AIIB loan.

Can solar power be used in the Maldives?

While diesel generators are the primary source of electricity, the Maldives is also exploring renewable energy options. Given the abundance of sunlight the islands receive, solar power is a promising alternative.

Why solar PV with storage in Maldives?

Solar PV with storage has proven suitable and competitive for Maldives' high penetration of renewable energy (POISED type B projects), with an average fuel savings of 25%. The concept design of hybrid systems (efficient diesel generators + solar PV plants + energy storage) has resulted in success for Maldives.

How do solar panels work in the Maldives?

In tropical islands like the Maldives, for example, photovoltaic panels are installed on the roofs of most resorts, delivering electricity during the presence of sunlight. However, diesel generators are still the main source of backup power.

Why are Maldives' buildings not energy efficient?

Inefficient lighting and household appliances are additional factors for the low levels of energy efficiency in Maldives' buildings.

Should investors invest in sustainable solar projects in the Maldives?

In 2014, the first 1.5 MW solar project under ASPIRE only had four investors bids, and resulted in a high power purchase price (PPA) of 21 US cents per unit of electricity, indicating a lack of interest from investors in investing in sustainable projects in the Maldives.

Towards this, through two World Bank-funded sustainable energy projects--Accelerating Sustainable Private Investment in Renewable Energy (ASPIRE), and Accelerating Renewable Energy Integration and Sustainable Energy (ARISE)--the Maldives will install more than 50 megawatts (MW) of solar capacity and 40 megawatt hours (MWH) of ...
