

# Mali storage cabinet for flammable liquid

Are flammable cabinets safe?

Flammable cabinets store flammable or combustible liquids safely. Eagle OSHA and NFPA 30 compliant fire cabinets are designed to offer safe, dependable protection from flammable liquids. Eagle fire cabinets may prevent fires and smother flames when used in combination with flammable liquid safety cans.

What are fire safety cabinets?

Fire safety cabinets are designed to store various hazardous materials, such as flammable liquids, paint, gasoline and pesticides. Eagle flammable liquid cabinets come in different sizes and configurations to accommodate different volumes of hazardous materials.

Are flammable cabinets NFPA compliant?

All our metal cabinets meet NFPA Code 30 and OSHA requirements. Flammable cabinets help keep flammable liquids near work areas safely. Constructed of 18-gauge steel, all cabinets feature reinforced double-wall construction with air space on the sides, top, bottom, back, and doors.

How many flammable cabinets are there?

Eagle has over 100 standard flammable cabinets storage options for storage of Category 4 or Class III chemicals. Large cabinets for storage of up to 90 gallons are 34 inches deep to accommodate large containers like drums. These cabinets can hold multiple small fire cans or larger drums.

Where should flammable and combustible liquids be stored?

The best place to store flammable and combustible liquids safely is in a fire cabinet in a cool, dry, and well-ventilated storage area. Keep it away from sources of ignition and exits, but ensure its contents are labeled properly and accessible by first responders in case of emergency.

How much flammable liquid can be stored in a fire Cabinet?

Categories 1 - 3 or Class I and II chemicals, may be stored in standard flammable liquids cabinets up to 60 gallons. These fire cabinets accommodate large containers with a depth of 34 inches and widths up to 43 inches. Adjustable shelves allow for storage of multiple small containers up to 350 pounds.
