

Mauritius matrix energy ltd

Who produces electricity in Mauritius?

Electricity in Mauritius is produced by the Central Electricity Board (CEB), which is overseen by the Ministry of Energy and Public Utilities. The CEB produces about 48% of Mauritius's electricity from 10 hydropower plants and four thermal power stations.

How does Mauritius generate energy?

Mauritius generates energy through various means including wind farms, solar energy, biomass, wave, and waste-to-energy projects. Currently, bagasse (sugarcane waste) is the leading source, contributing 13.3 percent to the renewable energy generation. Mauritius derives other renewable electricity from hydro, wind, landfill gas, and solar.

How has the Mauritian government changed the energy sector?

The Mauritian government has made significant changes in the energy sector. In particular, it created the Mauritius Renewable Energy Agency (MARENA) in 2016 to promote the use of renewable energy in Mauritius.

Does Mauritius use solar energy?

Mauritius has an attractive potential for solar energy, with an average annual solar radiation value of some 6 kWh/m²/day. Solar photovoltaic (PV) energy is an option due to the almost year-round intensive sunlight. To achieve the target of 60 percent renewable energy by 2030, Mauritius has commissioned six more solar farms.

Does Mauritius have a waste-to-energy project?

Mauritius produces about 500,000 tons of solid waste per year and its only landfill site is nearly full. In 2016, CEB (Mauritian utility company) issued a Request for Proposals for a 24 MW waste-to-energy project. Accordingly,

Are there integrated photovoltaics in Mauritius?

According to MARENA, there are currently no building integrated photovoltaics in Mauritius. Energy efficiency is now one of the main criteria in the design of public buildings and in rental of private buildings. The Green Building Council Mauritius was set up in 2009 to promote green building and is a member of World Green Building Council.
