What is a microgrid?

The DOE defines a microgrid as a group of interconnected loads and distributed energy resources (DERs) within clearly defined electrical boundaries that acts as a single controllable entity with respect to the power grid.

What is a Category 1 microgrid?

Category 1: Technology development R&D into new controls and protections, cybersecurity, software and hardware are critical areas with a focus on their application to microgrids.

What is a microgrid planning capability?

Planning capability that supports the ability to model and design new microgrid protection schemes that are more robust to changing conditions such as load types, inverter-based resources, and networked microgrids.

Why should a microgrid program focus on flexible and interoperable software?

The recommended focus on flexible and interoperable software will help promote agility in the microgrid program and stay at the forefront of modeling advanced control systems and their impact on planning and design. Education, technology transfer, and industry adoption.

What is MDT - microgrid design toolkit?

MDT - Microgrid Design Toolkit (MDT) is a decision support tool developed by Sandia National Laboratories for microgrid designers to conduct microgrid design feasibility studies. The MDT allows designers to model, analyze, and optimize the size and composition of new microgrids or modifications to existing systems.

Microgrid technology is an emerging area, and it has numerous advantages over the conventional power grid. A microgrid is defined as Distributed Energy Resources (DER) and interconnected loads with clearly defined electrical boundaries that act as a single controllable entity concerning the grid. Microgrid technology enables the connection and disconnection of the system from ...

Moreover, an increased research in the fields such as RES and DC microgrid has showed the pros of the same that helps in bringing the technology one step closer to real-time application. Fig. 1.2 shows the basic architecture of the DC microgrid (Che et al., 2015, Ferreira et al., 2013, Lonkar and Ponnaluri, 2015).
