Solar Lights with Solar Panels. Most indoor solar lights come with an independent solar panel. This panel needs to be set up separately from the light and where it can absorb the most quantity of sunlight. The solar panel is responsible for absorbing sunlight, which will later get converted to electricity to light up the house.

The light is easy to use, but it doesn't offer much in the way of aesthetics. The solar panel sticks up and away from the light. The solar panel is adjustable by 150 degrees though, and the spotlight itself is adjustable by up to 90 degrees, providing more flexibility. Its IP65 rating means it is a water-resistant solar light option.
