

Who owns the electricity in Monaco?

Monaco's sole national power company is Soci  t   Monogasque de l'Electricit   et du Gaz (SMEG, Monegasque Electricity and Gas Company), which operates the country's electric and gas grid and provides related services. SMEG is 60% owned by Engie, 20% by the State of Monaco, 15% by EDF, and the rest by private investors.

What is energy in Monaco?

Energy in Monaco describes energy production, consumption and importation in the Principality of Monaco. Monaco has no domestic sources of fossil fuels and relies entirely on imports of electricity, gas and fuels from France.

How much electricity does Monaco use?

In 2018, the country used around 536,000 MWh of electricity, of which a majority of it was used tertiary services. The first and later sole electric plant was a gas-fired power plant built by the casino operator SBM at base of Fort Antoine in Monaco-Ville.

Does Monaco use fossil fuels?

Monaco has no domestic sources of fossil fuels and relies entirely on imports of electricity, gas and fuels from France. Monaco's sole national power company is Soci  t   Monogasque de l'Electricit   et du Gaz (SMEG, Monegasque Electricity and Gas Company), which operates the country's electric and gas grid and provides related services.

To achieve carbon neutrality by 2050, Monaco has decided to increase the share of renewable energy, with a particular focus on the use of solar power. The Principality has access to plenty of solar resources, experiencing an average of 2,917 hours of useful sunshine every year.

It comprises a simple commitment charter and action plans for various sectors of the economy, allowing everyone to contribute, in their own way, to Monaco's energy transition, the goals of which are clear: reduce greenhouse gas emissions, take action to promote energy savings in the Principality, and increase local power generation from ...

In Monaco, it is possible to capture the energy of the sun in two ways: using photovoltaic panels, which transform sunlight into electricity, and with thermal panels, which use the energy produced by the sun's rays to heat water.

The National Pact on Energy Transition, which has just been launched by the Prince's Government, arose directly from the Paris Agreement and the White Paper. As the Principality's objective is to reduce greenhouse gas emissions by 50% by 2030 (compared with the baseline year of 1990) and achieve carbon neutrality by 2050, the actions carried ...

Monaco Green Energy aims to intervene by means of its products both on large-scale operations and on urban or isolated site issues, including in the context of international solidarity operations. Our range of systems is designed and adapted to meet the specific needs of each project in each region for each user. All of our implantation ...
