NetApp has agreed to acquire the Engenio external storage systems business of LSI for US\$480 million in cash, aiming to serve new applications with growing demands for storage and to get...

March 2011, LSI Corporation announced its sale of its Engenio external storage systems business to NetApp for \$480 million in cash. [1] The sale of the Engenio division, which generated revenues of \$705 million in 2010, completed in May.

An external storage system, or storage controller, is a device that coordinates and controls the operation of one or more disk drives. A storage system synchronizes the operation of the drives with the operation of the system as a whole. The system can manage a combination of internal and external storage and represents all the detected storage as MDisks.

LSI Corporation has signed a definitive agreement to sell its external storage systems business to NetApp, Inc. for \$480 million in cash. The company also announced that its board of directors has authorized a new stock repurchase program of up to \$750 million.
