Restore proper electrode performance and prolong electrode life using Thermo Scientific(TM) Orion(TM) pH Electrode Storage Solutions in ready to use bottles. La solución de almacenamiento garantiza que el electrodo de pH funcione correctamente después de un almacenamiento prolongado, durante la noche y entre muestras.

Ensures quality and freshness of solution; Each bottle marked with lot number and expiration date. Hanna pH storage solutions are specially formulated to have an expiration of 5 years from manufacture for an unopened bottle. * Never store pH or ORP electrodes in distilled or deionized water. Doing so will shorten the life of the sensor.

125ml pH/ ORP Probe Storage Solution. For safe storage of your probes. This 3 molar KCl solution is packed with Kathon GC preservative and topped off with a dash of potassium phthalate. If you are looking to enter the exciting world of long-term probe storage, look no further than Atlas Scientific pH/ORP storage solution.

Properly storing your pH electrode in a solution keeps the glass membrane well hydrated which maintains proper function and provides accurate readings. Special formulation to minimize bacterial growth on your electrode. Clearly marked expiration date and lot number for traceability. Designed for storing any pH or ORP electrode.

The 3 M potassium chloride (KCl) solution is a storage and regeneration solution to keep the electrodes of KROHNE SMARTPAT and OPTISENS pH sensors and ORP sensors from drying out and to extend sensor lifetime. It is available in 100 ml and 1 L containers.

Keep your pH probes in good working order with proper storage. This pH electrode storage solution is designed specifically for the Aqua TROLL pH sensors Includes: pH Storage Solution; MSDS sheet; \$39.00. Pricing only valid in the U.S. Be the first to review this product. Add to Cart.
