

National Solar Generator Equipment

I recently picked up the Anker SOLIX C800 Portable Power Station to use as a backup power source for camping trips and occasional home power outages. It's a well-designed, powerful unit that offers plenty of versatility for a variety of situations. The SOLIX C800 packs 768Wh of battery capacity and delivers 1200W of rated power, which is more than enough for ...

National Solar Generator Equipment

1. Solar Generators Are Easier to Maintain: With nearly zero moving parts within a solar generator system, there is less need for maintenance as opposed to a gas generator, which has several moving parts. Combustion in a gas-powered generator is essentially a series of small and controlled explosions within its engine.

If your average gas generator costs about \$1000 a similar output solar generator is going to cost you somewhere close to \$2000 - and maybe even more. Solar generators have lower operating costs in the long haul to offset that initial expense, but it still a pretty big hit to your bank account right away.
