

New scam solar generator on the street

What is a solar energy scam?

A solar energy scam typically involves someone claiming to be with the government or your utility company promising big savings on your utility bills from solar energy or other home improvements designed to increase energy efficiency. If you agree to the scammer's offer, it could cost you tens of thousands of dollars.

Are 'free' solar panels a scam?

Know that 'free' or 'no cost' solar panel offers are scams. The federal government does not install solar systems in homes for free. If you're considering solar energy, check out the Department of Energy's guide for homeowners and learn more, or check out the Department of Treasury's guidance on clean energy.

Are solar panels a scam or a cold call?

Here are the cold calls and potential scams to avoid. More than a third of solar PV panel owners in our recent survey told us they have been cold called about their panels in the past five years. Most cold callers were trying to sell them something unnecessary, but a few owners were told something completely untrue.

Are changes to our energy bills a scam?

Changes to our energy bills offer a prime opportunity for scammers to sow confusion - and this year is no different. In July, the government announced plans to scrap the winter fuel payment for millions of pensioners not claiming means-tested benefits.

Are energy scams real?

Yes, energy scams are real. Like investment scams, they are not new. In January, one Which? member received an email merging the two, titled 'Get more on your savings!' and claiming to be from SSE, offering a 'sustainability-linked bond' for investment in renewable energy.

What should I do if a solar business is a scam?

If you suspect a solar business is a scam, do not share your personal information with them. Ignore unexpected requests online or on social media for your name, address, or other personal information. They may be trying to steal your identity or generate leads to sell.

A portable solar generator is a solid option if you're looking for a solar generator that you can easily transport. These compact, lightweight, portable power stations are ideal for off-grid camping trips, outdoor events, or emergency home backup power for several appliances. Portable solar generators typically come with built-in handles or wheels for convenience.

The scams vary, but here's the gist: someone claiming to be with the government or your utility company promises big savings on your utility bills from solar energy or other home improvements designed to increase energy efficiency.

Be aware of solar energy scams - everything from scammers pretending to be affiliated with the government or utility company to businesses misrepresenting the cost of improvements, savings, and financing options.

In fact, most of those companies have all come out with new solar generator models in the last 6 to 12 months, well after the Titan had been released, and still, they haven't beaten the Titan. Take a look at this video and article that shows an apples-to-apples comparison between the Top 8 Solar Generators:

For solar charging, you need a special solar adapter cable that some manufacturers include in the solar generator kit. An average solar charging time is around 5 hours, but large generators like the Renogy Lycan 5000 and the Bluetti EP500 have a dual-charging mode which lets you charge from the grid and solar at the same time.

HOBOTECH just posted a fairly positive review of the Montek X-1000 portable solar generator which is currently funding on IGG. As expected, it looks like this review has caused the number of backers to increase over the last 12 or so hours. It's a pretty neat looking kit at what seems to be a...
