

How can Niger improve energy access?

Broadening energy access is a central national development objective in Niger. At present, less than 25% of the population enjoys access to electricity, and the picture in rural areas is bleaker, at less than 5% electricity access. Generation of electricity through renewables has long been viewed as an important way to close this gap.

How is energy used in Niger?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

Who is the Nigerien Groupe Sogha?

In 2018, the Executive Committee of the African Music Council, headquartered in Brazzaville, Congo, decided to admit the Nigerien Groupe Sogha as a member of the Council under the category of National and Specialized Organizations.

How successful is Niger's energy development mission?

Ultimately, the success of the country's energy development mission will be judged by the quality of its results and scale of improvements in livelihoods. Renewable energy applications across Niger have been linked to excellent social development outcomes. The cost of renewables is at an all-time low, especially PV.

What is Niger's energy mix?

Mainly used for electricity generation and transport, petroleum products account for 18% of Niger's energy mix. Their share of the total has increased in recent years. Mineral coal for electricity generation accounts for the remaining balance at 3% of total energy supplies in Niger.

Where is solar energy used in Niger?

Niamey and Zinder, located at lower latitudes, show less variability across the year, hence making them excellent locations for harnessing solar energy. There is a long history of solar energy use in Niger. This began in the mid-1960s when the Centre National d'Énergie Solaire (National Solar Energy Centre; CNES) was established.

Niger: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

The one of Soga Energy Team started back in 1966 in the Italian North-East, when Lino Soga established his own company. Today, Soga Energy Team is an industrial group made of 3 companies (Soga S.p.A, Sincro d.o.o, CMZ Sistemi Elettronici S.r.l) and holding 5 brands (Soga, Sincro, AgroWatt, Sogaenergies, CMZ),
