Will Norway start a battery plant?

The Norwegian company opened the Nordic country's first battery cell plant in August and has said it plans to expand production step by step. “The loan facility will be available for tomorrow to fund the scale-up and development of battery manufacturing in Norway,” Innovation Norway said in a statement.

Will Norway's Energy Partnership help boost growth?

Sir Keir said the energy partnership with Norway, which has a border with Russia, would help to boost growth and protect against spikes in international energy prices like those seen when President Vladimir Putin invaded Ukraine.

Will Norway and Ukraine collaborate on a new energy deal?

They will discuss cooperation on issues including Ukraine, the Middle East and the Indo-Pacific. Sir Keir said the energy partnership with Norway would help to boost growth and protect against spikes in international energy prices like those seen when President Vladimir Putin invaded Ukraine.

Why does Norway want to enter the battery production industry?

The country wants to enter the battery cell production industry, hoping to benefit from access to green power and proximity to European customers keen to source batteries away from China. Innovation Norway said the loan facility contributed to the realisation of the government's battery strategy.
