Off grid cold storage Saint Lucia

Off-grid storage systems have been used to attenuate fluctuations and provide more stability in cases of peak demand. From a different perspective, off-the grid storage systems can be highly beneficial to compensate for any unforeseen technical fault in the main power grid or during scheduled maintenance periods.

SokoFresh offers affordable cold storage services to Kenyan farmers and agribusinesses, integrating it with market linkage services. More than 800 farmers have been onboarded and 3 cold storage systems have been deployed. MARKET AND STRATEGY The market for off-grid solar cold storage solutions in Sub-Saharan Africa is USD 6.25bn.

Our Cooler rooms and Freezer rooms are entirely powered by 100% solar energy, making them ideal for achieving net zero goals as well as energy access goals. In addition to powering cooling facilities, the off-grid solar plant also supplies electricity to other vital elements of the supply chain, such as offices and electric vehicles.

The cold energy is sent to the storage room using an ultra-low power consumption pump. A heat exchanger and a control system guarantee reliable cold transfer and air distribution to the storage room. With the solar-powered Cold Room, different products can be cooled down independently of any infrastructure using only the sun's energy.
