

On grid solar system for home France

How many solar panels are installed in France?

Solar panel installations are increasing in France with the last year seeing over 200,000 installations across the country as prices fell. This includes installations from both professionals and from DIY kits, which allow homeowners to set up the panels by themselves. Read more: [Why record numbers of homeowners in France are installing solar panels](#)

Are solar panels a good option in France?

More and more companies are either selling, or installing, solar panels for people across France. This, coupled with rising energy costs, continues to make solar panels appear an attractive alternative to gas or electric energy sources, for both homeowners and businesses. Here we answer eight common queries about solar panel installation in France.

How much does a DIY solar panel cost in France?

The average price for a DIY kit including 16 panels is around EUR6,250. These are generally capable of producing 64,000Wh (watt crête, or 6.4 kWh), which is about 1.5x the power consumption of an average household in France.

Should you install solar panels on your French property?

The installation of solar panels on your French property is a tempting proposition for many owners, but the rewards are long-term, and it is not without risk. Thermal or Photovoltaic Solar Panels? At the outset it is important to define the term 'solar panel' as there are two types of panels, which are frequently confused with one another.

Are there grants for solar panels in France?

There are also grants available for energy conservation (but not photovoltaic solar panels) as part of the home improvement grant regime 'MaPrimeRénov' run by Anah, the housing renewal agency, but these are means-tested. [How much does it Cost to install Solar Panels in France?](#)

Are there tax credits for solar panels in France?

Since 1st January 2014 there are no longer any tax credits available for the installation of photovoltaic solar panels. Nevertheless, in France, as in many other countries, there are incentives in place for property owners to sell electricity back into the grid at preferential prices.

Our 6kW DIY solar systems produce about 6000 watts of power for your home. Shop both grid-tie and off-grid 6kW solar kits. Skip to content. Just added to your cart. Qty: View cart () Continue shopping
