Is Oztek part of trystar?

To strengthen its presence in renewables market, industrial power products manufacturer Trystar, based in Faribault, MN, has acquired Merrimack, NH based Oztek Corp, a manufacturer of commercial and industrial power conversion and power electronics products. The acquisition deal was closed on May 5, making Oztek part of Trystar.

Who is Oztek Corp?

We're excited to announce our acquisition of Oztek Corp, a manufacturer of commercial and industrial power conversion and power electronics products.

Why should you choose Oztek?

"Trystar is at the forefront of electrification, renewables, and power grid resiliency. Adding the Oztek products to our already extensive portfolio of electrical power products will allow us to create more complete, integrated solutions for our customers, particularly in wind, solar, microgrids, and battery storage applications.

What products does Oztek offer?

Presently, Oztek products include battery inverters and energy storage power conversion systems, bidirectional dc power supplies, printed circuit power supplies for motor drives and inverters, as well as silicon-controlled rectifier (SCR) controllers and firing boards.

Where are Oztek products made?

Headquartered in Merrimack, NH, Oztek products include battery inverters and energy storage power conversion systems, bi-directional DC power supplies, printed circuit power supplies for motor drives and inverters, as well as silicon controlled rectifier (SCR) controllers and firing boards.

Does Oztek still make power conversion systems?

According to Trystar, Oztek will continue to produce and expand its power conversion products offering for energy storage systems, with continued focus on compact, high-performing, long life solutions. It will now be called Power Conversion Systems Division of Trystar, said the buyer.

From advanced power inverters and high-power density designs to modular converters, Oztek's solutions complement Trystar's commitment to resilient and customizable power systems. Our team of skilled experts is ready to support your unique power needs.

Demand for electricity is expected to continue growing at historical rates for the foreseeable future. While utility companies strive to meet that demand by financing and constructing new power-generating plants, fueled by coal, atomic energy, wind, sunlight, and water, they're also scrambling to create a "smart grid."

OZPCS-EP40 provides the same grid-connected and grid-forming flexibility and performance as OZPCS-RS40 for solar+storage, resiliency, demand charge management, microgrid, and other energy storage applications, but in an wall-mount, outdoor-rated package.

Trystar last week announced the acquisition of Oztek Corp., a manufacturer of commercial and industrial power conversion and power electronics products. The acquisition is expected to accelerate Trystar's strategy to broaden the portfolio of electrical power solutions it can provide for its customers and strengthen its capabilities in ...

Why Oztek? MENU. Stand Alone Voltage Mode Inverters. By Dave Zendzian August 19, 2013; As previously discussed, most modern sine wave inverters employ a voltage source topology and are referred to as voltage source inverters (VSI). Depending on the type of feedback and control scheme that is employed, the VSI topology can be used to implement ...

Oztek's OZDSP2000 and OZDSP3000 are used by various customers in both the Wind and Solar industries. Oztek has also provided an OEM solution for a Solar DC/DC Boost Converter. The extension of 1603 should lead to more project launches in 2011.
