Who owns Phi Energy Corporation?

PHI Energy Corporation was founded in 2005 as Providential Oil & Gas, Inc., and has been engaged in oil and gas joint ventures with various U.S. companies in Texas and California, and is a majority owned subsidiary of AXN Group, a global investor in oil & gas, forestry/timber, and mining.

What is Panama's energy supply?

This page is part of Global Energy Monitor's Latin America Energy Portal. Panama currently relies on imported oil for the majority of its total energy supply. In the electrical sector, hydro energy also plays a key role, accounting for 43.9% of installed capacity and 67.2% of total generation as of 2020.

What is Panama's Plan Energético Nacional?

The PEN (Plan Energético Nacional) 2015-2050 aims to drastically increase the use of renewable energy in Panama to 70% of the country's energy mix. Panama aims to be carbon neutral by 2050, partially by emphasizing forest restoration to absorb CO2 emissions.

Who is responsible for energy distribution in Panama?

Three distributors are responsible for energy distribution in Panama: ENSA, Edemet, and Edechi. Electricity is distributed via Panama's nationally interconnected system (SIN). Electricity prices are impacted by weather patterns because of Panama's use of hydropower.

Where can I study energy and Environmental Engineering in Panama?

These include the energy and environmental engineering course offered by the Technological University of Panama (UTP) at the undergraduate, master's and doctoral levels, and upcoming degrees at the University of Panama (UP) in electricity and renewable energy engineering.

Did Phi energy issue a promissory note?

PHI Energy issued promissory notes for US \$3,000,000 and 47 million shares of common stock of the company, valued at \$1.00 per share, in exchange for total estimated mineable coal reserves of 33,000,000 metric tons located in West Sumatra, Kampar and South Kalimantan, Indonesia.

Panama Total Energy Consumption. In 2022, energy consumption per capita was 1.2 toe, including 2,650 kWh of electricity. Total energy consumption has been increasing very rapidly since 2020 (14%/year), following very high economic growth; it reached 5 Mtoe in 2022.
