Following sub-Saharan Africa, Asia is the region with the second largest energy-access gap, containing four of the world"s top 20 energy-access deficit countries. There is a strong demand among off-grid consumers in Asia for reliable, clean and cost-effective alternatives to fuel-based lighting, as well as the additional services that off-grid energy can provide.

Lighting Global maintient les Normes de qualité, une suite des références qui établit un ensemble des niveaux de base de qualité, durabilité, et de la publicité non mensongère pour protéger les consommateurs. Ces Normes appliquent aux produits ayant une puissance jusqu"au 10 W inclus. [Remarque : Les produits ayant une puissance plus que 10W jusqu"au 350
