The appearance is worse than that of aluminum alloy profiles. Therefore, in terms of appearance, the aluminum alloy photovoltaic bracket is also better. Aluminum alloy profile photovoltaic brackets are generally processed by extrusion, casting, bending, stamping and other methods. Extrusion production is the current mainstream production method.

The company focuses on solar photovoltaic bracket production and hot-DIP galvanizing processing. The company introduces environmentally friendly production equipment and has multiple photovoltaic bracket production lines, specializing in steel hot-DIP galvanizing processing and solar photovoltaic brackets.
