2.1 Evaluation of Proposed Topology. For conventional topology, variation of modulation index concerning change in input voltage is shown in Table 1. As seen from Table 1, it is clear that at $(V_{PV}) = 220$ V, the modulation index is 1.5 and for $(V_{PV}) = 380$ V, the modulation index is 0.58. So, we have to operate the inverter in over modulation and under ...
