overview of the ceb solar pv scheme for domestic customers (households) In line with the measures announced in the National Budget Speech 2021-2022, the Central Electricity Board (CEB) is pleased to inform its customers and the general public of the launching of the " CEB Solar PV Scheme for Domestic Customers (Households) " on 26 November 2021.

Suppose, in our case the load is 3000 Wh/per day. To know the needed total W Peak of a solar panel capacity, we use PFG factor i.e. Total W Peak of PV panel capacity = 3000 / 3.2 (PFG) = 931 W Peak. Now, the required number of PV panels are = 931 / 160W = 5.8. This way, we need 6 numbers of solar panels each rated for 160W.
