In short i need to charge a 72 volt battery bank from 12 volt (960W total) panels . I recently bought an old Miles Electric pickup truck that has a 72 volt battery and would like to only charge it primarily from the sun. I've been looking for some time, but i cannot seem to find any controllers that go from a 12v PV setup to a 72v battery.

Multiple solar cells are used for the construction of the solar panel. A solar panel is made of solar cells arranged in a framework that can contain 32, 36, 48, 60, 72, and 96 cells.The most commonly used solar panel has 32 cells that have the capability to produce 14.72V output (each cell generates up to 0.46V of electricity).
