Solar PV and Battery Storage is becoming an increasingly popular option for clients wishing to reduce not only their energy bills but also reduce their carbon footprint. Solar photovoltaic panels can capture the sun's free energy which can then be converted into usable electricity for a wide range of applications.

A Battery System can make full use of the power generated by your solar panels, ensuring that any unused power is stored on site to be used later when needed. If your electricity is supplied with two rates (a day rate and cheaper night rate), the solar + battery combination ensures that peak rate electricity usage is kept to a minimum.
