Will a new wind energy system deliver green electricity to Mauritius?

A new and innovative form of wind power will soon deliver green electricity to the Republic of Mauritius. Mauritian-based company IBL Energy Holdings Ltd. and German SkySails Power GmbH have agreed on the installation of an airborne wind energy system.

How does the Mauritius power plant work?

The Mauritius power plant generates electricity using photovoltaic inverters. These inverters automatically detect problems and transmit energy production forecasts to the Central Electricity Board every 30 minutes. The plant pioneered cogeneration in Mauritius in 1986 and continues this trend.

Does Mauritius have cogeneration?

Alteo pioneered cogeneration in Mauritius in 1986. Our 41MW biomass/coal power plant supplies steam and electricity to our milling operations and exports electricity to the national grid. Annually, we export an average of 170 GWh of electricity to the Central Electricity Board.

Will airborne wind power help Mauritius achieve 40% renewables?

The Republic of Mauritius is targeting a 40% share of renewables in its electricity mix by 2030. Thanks to its specific advantages, airborne wind energy is set to play a vital role in achieving this objective.

We pioneered cogeneration in Mauritius in 1986 and we are continuing on this trend. Our 41MW biomass/coal power plant supplies steam and electricity to our milling operations and the national grid, exporting an annual average of 170 GWh of electricity to the Central Electricity Board.

In a significant move towards sustainable energy, three companies, Les Moulins de la Concorde Ltd, Maurilait Production Ltd, and Oceanarium Mauritius Ltd, have entered into a partnership to establish a 8-9 MW solar photovoltaic farm in Amaury, Mauritius. The project is set to be built on a 182,000 square meter land owned by Alteo Agri [...]

Energy companies in Mauritius are primarily responsible for the production, distribution, and supply of energy resources such as electricity, petroleum, and natural gas. The main energy supplier in Mauritius is the Central Electricity Board (CEB), which generates and distributes electricity to the island.

Mauritius: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Bambous, March 1, 2023 - Qair, an independent renewable energy producer, announces the signature with the Central Electricity Board (CEB) of four power purchase agreements for Renewable Energy from Solar PV and
