

How much energy does Azerbaijan need?

Azerbaijan's energy demand (measured as total energy supply [TES]) was 16.1 million tonnes of oil equivalent (Mtoe) in 2022 (according to preliminary data from the State Statistical Committee). Azerbaijan is a major producer of crude oil (32.7 Mt including natural gas liquids in 2022) and of natural gas (35.0 bcm in 2022).

Which energy sources are used in the transport sector in Azerbaijan?

Most oil products used in the transport sector are produced in Azerbaijan. TFC consists mainly of natural gas (43%) and oil products (39%), followed by electricity (15%). Renewable energy sources, including hydro, contributed 1.5% to total energy supply in 2022 and 6% (1.8 TWh) to electricity supply.

What regulatory regimes apply to oil & gas production in Azerbaijan?

Two basic regulatory regimes apply to oil and gas exploration and production in Azerbaijan: the system established under the Law on Energy and implemented through energy contracts, and regimes particular to each case established by specific production sharing agreements (PSAs).

Who owns Azerbaijan's Oil & Gas?

The day-to-day operations of Azerbaijan's oil and natural gas deposits are overseen by the State Oil Company of Azerbaijan (SOCAR), which was established in 1992 as a state-owned monopoly. SOCAR is involved in the exploration, extraction, transportation, and sale of Azerbaijan's oil and gas, both domestically and internationally.

What is Azerbaijan's energy policy?

The 2004 State Programme on the Development of the Fuel-Energy Complex for 2005 to 2015, designed to support oil and gas developments and to ensure energy supply security, set out Azerbaijan's main energy policy.

How much natural gas does Azerbaijan have?

Azerbaijan has an estimated 2.5 trillion cubic metres of proven natural gas reserves, according to the BP Statistical Review of World Energy 2021. While Azerbaijan is not as prominent in global gas as it is in oil, gas extraction is expected to continue contributing significantly to the economy in upcoming decades.

The Presidential Administration, the Cabinet of Ministers and the Ministry of Energy (MoE) are the energy sector's main government institutions, while individual subsectors are controlled by several state-owned monopolies, including SOCAR (oil refining, natural gas distribution and supply [State Oil Company of the Republic of Azerbaijan]), Azerenergy/Azerenerji (electricity generation and ...

Source: IEA analysis (2023) based on data provided by the State Statistical Committee of the Republic of Azerbaijan (SSC). Key energy data . Supply Azerbaijan's energy demand (measured total energy supply [TES]) was as 16.1 million tonnes of oil equivalent (Mtoe) in 2022 (according to preliminary data from the State Statistical Committee).

This paper gives an overview of the impacts of Nagorno-Karabagh issue and efforts to normalize the relations between Turkey and Armenia on relations between Turkey and Azerbaijan. Energy has a special place in the relationship between the two countries. Azerbaijan's economy, energy sectors of Azerbaijan and Turkey has been assessed.

Meanwhile, a joint venture launched in September 2024 to install an electricity supply line under the Black Sea will bring Azerbaijan's renewable energy to EU markets. These projects come with pledges to ...

It takes the actual energy output and divides it by the max potential energy. This comparison is shown as a percentage. The PLF formula is: $PLF = (Actual\ Energy\ Output / Potential\ Maximum\ Energy\ Output) \times 100\%$. Calculation of Plant Load Factor. To find the PLF, operators must know how much energy the solar plant produced in a time, like a month.
