What is Poland's new solar energy rebate?

The rebate for storage will grow from PLN 7,500 to PLN 16,000, according to the Mój Prad website. The higher rebates will be designed to strengthen Poland's energy security amid Russia's ongoing war in Ukraine. The scheme is open to residential rooftop PV projects ranging in size from 2 kW to 10 kW, and storage installations from 2 kWh.

Will Poland increase subsidy levels for PV & storage installations?

Poland's government has revealed that it will increase subsidy levels for residential PV and storage installations under the Mój Prad (My Electricity) rebate scheme. As of Dec. 15, the subsidy for solar will be raised from PLN 4,000 to PLN 6,000.

Will Poland raise solar subsidy levels in December?

The Polish government will raise subsidy levels for rooftop PV and storage systems from December under its Mój Prad scheme. The rebate for solar will increase from PLN 4,000 (\$888) to PLN 6,000 and will more than double from PLN 7,500 to PLN 16,000 for storage.

Are photovoltaic subsidies open in Poland?

During today's press conference, Ministers of Environment and Energy - Henryk Kowalczyk and Krzysztof Tchórzewski - announced that the call for applications for subsidies for photovoltaic installations in Poland under the "My Electricity" programme is now open.

How does a micro-installation scheme work in Poland?

Prosumers can submit applications under an agreement regulating the injection of electricity generated from micro-installations into the Polish grid. Since the scheme was launched in 2019, it has allocated more than PLN 1.7 billion to 411,494 PV projects.

How much will Poland's new energy-efficient house program cost?

"The program will be comprehensive support in the process of transforming a single-family building into a low-emission and energy-efficient house," said Polish Minister of Climate and Environment Anna Moskwa, noting that the maximum rebate under the scheme will be PLN 58,000 (\$13,150).
