

Portugal vergo energy

Who is Vergo solar?

Vergo is a pioneer solar mounting structure company exceeding 8.5 GWp worldwide references in 8 years.

Does Portugal have solar energy?

Portugal has heavily invested in wind and solar in particular. Regarding solar energy, Portugal has increased its photovoltaic power and solar term energy in the last two decades. The country was actually 9th in solar heating in the whole of the European Union in 2010 based on total volume.

How can Portugal meet growing energy demands in a sustainable way?

Meanwhile, the rapid expansion of hydroelectric and solar energy capacity is helping Portugal meet growing energy demands in a sustainable way. These efforts align with European Union objectives, such as the RePowerEU plan and the Renewable Energy Directive, which targets 42.5% renewable energy in total consumption by 2030.

What percentage of energy is renewable in Portugal?

In 2013, 25.7% of the energy in Portugal was renewable, increasing to 27% in 2014 and 28% in 2016. By 2020, this number increased to around 30%. Portugal made worldwide news when in February 2016, 95% of the electricity produced in Portugal was sourced from renewable energy, including biomass, hydropower, wind power, and solar power.

Does Portugal have a high level of electrification?

Portugal has a high level of electrification. In 2019, electricity covered 25% of the total final energy demand, 56% of building energy demand, and 25% of industry energy demand, according to IEA. A significant portion of the electricity in Portugal is produced through a renewable source, over 50%.

How does Portugal produce electricity?

Portugal mostly uses hydroelectricity and wind to produce electricity, with wind power being the largest. However, Portugal is still heavily dependent on imported coal for electricity production. Still, Portugal agreed to close all coal facilities by 2030. There is no nuclear energy production in Portugal.

Portugal: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

Our strength lies in building the world's most reliable and efficient large-scale solar mounting structures, our experience, capabilities and resources allow us to position ourselves as your partner and provider of sustainable steel parts for solar energy.

Europe, including Portugal, has experienced a deindustrialization wave and overall loss of competitiveness in recent decades. The energy transition, however, presents a real opportunity to reignite growth and reindustrialize the economy, and Portugal is well positioned to become a "speedboat," leading the way within Europe's economic plan.

Portugal ranks 7th in countries with the highest share of renewable sources used to produce energy in Europe. As of May 2023, renewable energy incorporation in mainland Portugal was 60.3%, 30.3% in Madeira, and 35.1% in the Azorean islands. Portugal continues to be a global leader in renewable energy production.
