KBR Energy Saver: Coolnomix Installed at Greene King. We have a long standing relationship with leading pub chain, Greene king. We discovered a new opportunity to achieve savings across refrigeration units on a site. Greene King relies on their refrigeration to ensure goods are kept cool for their customers, and to maintain freshness.

Voltage Optimisation (VO) operates as a precise and dynamic method deeply rooted in the principles of Ohm's Law. At its core, VO is designed to strategically manage the voltage supplied to electrical equipment, ensuring it aligns precisely with the specific requirements of each device. This process is finely tuned to optimise energy usage while maintaining
