## Pqs energy Cabo Verde

The archipelago of Cape Verde is a developing state in West Africa with extreme external energy dependency on refined oil imports despite their available solar and wind resources. Aligned with the global energy transition, the local government established goals in 2011 aiming at 50 and 100% RES.

will not affect sensitive ecosystems in Cabo Verde. On the social side, the installation of solar PV power plants and electricity distribution networks could lead to environmental and social risks similar to those traditionally associated with infrastructure works.
