

Rent a house to generate solar power

It used to be considered by many that the UK did not receive enough sunshine to justify investing in solar power. The recent proliferation of PV arrays on roofs and in solar farms has dispelled that myth and it is the efficient ...

Rent-a-Roof lets you benefit from solar power for reduced prices; A 3.5 kilowatt solar system can save you thousands of pounds; Solar panels reduce your carbon emissions; The Rent-a-Roof scheme has declined ...

The electricity provided by solar power, then, needs to accommodate for heating, air conditioning (which, by far, is one of the biggest drains of power in a house), other parts of the house's infrastructure like lighting and vent fans, all major appliances (refrigerator, stove, washer and dryer) and other electronics like the stereos, televisions and computers.

A solar power purchase agreement (PPA) is a financial agreement where a developer arranges for the design, permitting, financing, and installation of a solar array on a customer's property. The developer sells the power generated to the host customer - typically at a fixed rate that is lower than the local utility's retail rate.

Consultation: Discuss your energy needs. Customized Proposals: Get a tailored solar system rental or rent-to-own proposal. Payment Plans: Select a plan that aligns with your budget.
