

Resu 10h prime Papua New Guinea

How much power does the LG Chem RESU10H Prime have?

The maximum 19.2kWh of energy (in parallel) and 10kW of continuous power output with 14 kW of peak burst enables partial home backup on demand and during blackouts. The LG Chem RESU10H Prime is a 9.6 kWh home battery for daily cycle use that re-charges with electricity generated from PV solar panels or utility grid.

What is the difference between a Resu Prime and a 10h?

Both RESU Prime models include two vertically oriented battery modules that stack on top of a floor mounting plate and a battery control unit (BCU) that sits atop the stack. The only difference between the 10H and 16H is how many battery cells are inside the modules, which determines size, capacity, and power output.

What is the difference between LG Chem Resu & Resu Prime?

The LG Chem RESU boasts a depth of discharge of 95 percent across all battery sizes, reflective of its safe and advanced NMC battery chemistry. The RESU Prime boasts an excellent depth of discharge of 100%. Roundtrip efficiency is a measure of electrical losses involved with charging and discharging a battery.

The LG Chem RESU 10H Prime is a 9.6 kWh, 400V home battery and it's perfect for houses with high-energy storage needs. With its compact and lightweight design, this model features L& S (Lamination & Stacking) technology and has a rated power of 4.2 kW and boasts a high DC round-trip efficiency of 95% .

Powerful Performance - The new RESU series features industry-leading continuous power and DC round-trip efficiency (95%). LG Chem's L& S (Lamination & Stacking) technology provides durability ensuring 80% of capacity retention after 10 years.

LG Chem RESU 10H Prime battery set A new generation of high-voltage home energy storage systems. New LG Chem RESU Prime storage applications will come in two versions: LG Chem RESU10H Prime and LG Chem RESU16H ...

With LG PRIME, the high energy capacity and power output allow the entire home to be backed up during both peak hours and blackouts. The detachable control unit can be replaced on site, saving time and maintenance costs. With RESU Monitor it is possible to monitor the battery status in real time and perform diagnostics to detect anomalies.

*LGESVT's new app-based RMA platform, GECP, is available for download or web-based usage. It allows for real-time updates on RMA submittals. Please ensure that all troubleshooting guidance is followed prior to, and on, submittal, pages 2-5 RESU RMA PROCESS. *Refunds of used equipment have been phased out, page 4 RESU RMA PROCESS [section 6.b.iii.].
