Who is Hyperion solar?

Hyperion Solar's module workshop. Image: Hyperion Solar. American Hyperion Solar, a subsidiary of Runergy, has announced that it has signed a long-term supply contract for 1.65GW of modules with a leading US utility developer, marking a significant milestone for the brand in the US market.

Will runergy & American Hyperion solar partner with nanosun?

Mitchell Aguirre enthusiastically welcomed the partnership, acknowledging the agreement's potential to empower Nanosun by harnessing Runergy & American Hyperion Solar's extensive experience and expertise in the photovoltaic industry to expand its global reach.

What makes Hyperion different from runergy group?

With Runergy Group's solid cell R&D and manufacturing strength, Hyperion focuses on the R&D, production and sales of high-end modules. Hyperion now has module production capacity of 12GW, which fully matches the next generation of ultra-high power N-type cells technology.

Who is runergy?

Runergy is one such innovator and has become one of the leading PV cell manufacturers in the world since its establishment in 2013. We are ranked 3rd for global PV cell sales by PVInfoLink from 2020 to 2022 with a current high-efficiency cell capacity of 25GW.

Where is runergy ranked?

We are ranked 3rd for global PV cell sales by PVInfoLink from 2020 to 2022 with a current high-efficiency cell capacity of 25GW. Runergy, founded in 2013, is the leading PV cell and solar module manufacturers in the world.

What is nanosun & runergy & Hyperion agreement?

This agreement between Nanosun and Runergy & Hyperion signifies the commencement of a concerted and steadfast effort to introduce the world's leading PV modules to multiple regions. With this agreement in effect, both companies are positioned to broaden their collaboration and pursue novel prospects in diverse countries across the world.

To help clients achieve low LCOE, Runergy launched H1 Series high performance Mono PERC double glass modules. We offer various format products under this platform, such as HY-DH144P8 large size module for utility projects. This series products are with 182mm size half-cut cells and with high density inter-connection design.

Among the newest offerings of Hyperion (Runergy), DH108P8B-410 is part of the HY series. These panels use state-of-the-art technology to achieve high efficiency and dependability. The Passivated Emitter Rear

Hyperion markiert den offiziellen Einstieg von Runergy in das Modulfertigungsgeschäft. Das Siliziumprojekt Ningxia Runergy startet. 2022 Die Produktionsanlage für Hyperion-Module wird in Betrieb genommen. Die Silizium-Produktions-anlage in Ningxia hat den Betrieb aufgenommen. 2023 Die Zellfertigungsproduktion in Yunnan nimmt den Betrieb auf.

The modules, which include many Runergy P-Type M-10 bifacial cells, are rated between 390 watts and 550 watts. "We created Hyperion modules so we could bring our solar expertise to the entire process, controlling the entire solar supply chain from sourcing to module manufacturing," said Cheng Zhu, vice president of global business at Runergy.

Nanosun and Runergy & American Hyperion Solar have unveiled a strategic global distribution agreement, which was formally signed during the RE+ Vegas event. Pursuant to the agreement, both companies have committed to collaborate in the exploration of the photovoltaic market in Europe, the Middle East, and the United States.

ABOUT HYPERION In 2021, Jiangsu Hyperion module production base was established in Yancheng. With Runergy Group's solid cell R& D and manufacturing strength, Hyperion focuses on the R& D, production and sales of high-end modules. Hyperion now has module production capacity of 12GW, which fully matches the next gen.
