

Does the Russian energy weapon affect energy-system transformation in the EU?

We conclude that the Russian energy weapon had only had short-term economic consequences, but influences energy-system transformation in the EU, accelerating diversification and renewable deployment. 1.

Introduction

Does Russia use energy as a geopolitical weapon?

The Russian invasion of Ukraine has triggered renewed focus on the use of energy as a geopolitical weapon. However, the experiences for oil and natural gas--Russia's two main energy exports and the leading energy sources for the EU--have followed markedly different paths.

Is Russia targeting Ukraine's energy facilities?

The facility has been repeatedly targeted by Russian airstrikes. Mauricio Lima for The New York Times Russia launched a missile attack on Ukraine's energy infrastructure early Friday, in an assault that President Volodymyr Zelensky described as "one of the largest strikes" on his country's power facilities.

How did Russia use its energy weapon in 2022?

In 2022 Russia was clearly using its energy weapon to make a point and pressure European states who sided with Ukraine in the conflict. Based on Van de Graaf and Colgan we use the term energy weapon to describe the action when one state uses or threatens to use its energy resources to compel or deter another state.

How did the war in Ukraine affect energy security?

The war in Ukraine was preceded by steeply rising natural gas and electricity prices, which already put European consumers under pressure, threatening the first pillar of energy security: affordability 5.

Can the EU phase out Russian gas?

The global potency of the Russian energy weapon is assessed. A novel approach combining energy trade and macroeconomic modelling is applied. The EU can phase out Russian gas in the medium-term without an economic slowdown. Adaptation stimulates investment and brings environmental benefits.

Germany and the EU-Russia energy dialogue, in Aalto, P. eds, The EU-Russian energy dialogue, Ashgate Publishing, 93-118 Westphal, K. (2020). German-Russian gas relations in face of the energy transition, Russian Journal of Economics, 6(4), 406-423.

16 ????· Russian energy exports already fell by 100,000 barrels per day in November. This resulted in a revenue loss of \$1.1 billion. Should Trump tighten the price cap on Russian oil, or crack down on its ...
