The Critical Materials Monitor aims to improve understanding of supply chains essential for the energy transition, the transition to more sustainable energy. It offers insights into the critical minerals required, outlines the components of key technologies, and provides in-depth reserve, production, and trade analysis.

UK-based Harmony Energy has announced that it will commence construction on the Chevir#233; battery project, France's largest battery energy storage system (BESS). The BESS facility will be equipped with Tesla Megapack technology.

Additional notes: Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. The value of energy trade has been defined as including all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation has been calculated as annual generation divided by capacity x 8,760.

Energy Vault has disclosed plans for a 57MW/114MWh battery energy storage system (BESS), named Cross Trails BESS, in Scurry County of Texas, US. Construction is set to start in the first quarter (Q1) of 2025, with
