

Saudi Arabia energy management startup

Are there tech startups in Saudi Arabia?

Below is a list of tech startups in Saudi Arabia, there are so many startups launching these days and at the same time many close to lack of commitment by founders, lack of funding, or just didn't have a good market. I try to keep the list updated with startups that have a unique concept or good market share.

Are climate tech companies working in Saudi Arabia?

Many climate tech companies are working in Saudi Arabia to develop carbon-neutral alternatives to everyday technology. Companies like Red Sea Farms, Iyris, and Mirai Solar have helped Saudi take steps toward Vision 2030 while also helping the world reduce the impact of global warming.

How does Edama help Saudi farmers grow more?

With Edama's technology, Saudi farmers can grow more produce using the same amount of water they currently desalinate. Growing more lowers average carbon emissions per produce and enables Saudi to grow closer to a critical Vision 2030 goal--food independence. Learn more about Edama Organic Solutions by visiting their website.

How do greenhouses work in Saudi Arabia?

These greenhouses grow crops mainly using clean energy for cooling, watering and desalination. Greenhouses require lots of power to maintain the ideal humidity and temperature to grow these crops in the dry, arid Saudi Arabian environment. This leads to higher greenhouse gas emissions as many are powered by coal or natural gas.

Does Saudi agriculture need a lot of water?

And most Saudi and MENA farms require food to be grown with desalinated water. Obtaining fresh water using this method requires lots of energy--usually from natural gas or coal--which releases CO2 emissions that contribute to climate change. While you can't eliminate water from agriculture, you can lower how much is needed.

Recently named Saudi Arabia's most promising tech startup by KPMG's Private Enterprise Global Tech Innovator, Netzero beat six other Saudi tech startups to the crown, standing out for its "innovative approach in helping solve environmental challenges", said Samer Abdallah, Head of ICT Sector at KPMG, Saudi.
