Niger has started generating electricity from a solar plant near the capital Niamey to make up for power shortages caused by neighboring Nigeria cutting energy supplies, according to several reports.

Niger: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

The Niger Solar Electricity Access Project (NESAP), aimed at enhancing electricity access in rural and peri-urban areas of Niger through solar energy, started in 2017 and has built 15 solar power plants.

Niger has one of the lowest electrification rates in sub-Saharan Africa. Only one in seven Nigeriens have access to modern electricity services, and just four percent of rural residents have access through the national utility.

SEMA is a new, innovative partnership that aims to transform sexual and reproductive health (SRH) markets so that people everywhere have sustained access to comprehensive, quality, and affordable SRH products. SEMA was announced in July 2021 in France, with country governments from Burkina Faso, Nigeria, and Uganda; financial support from the ...

Oil giant Shell said it will invest in a deep-water reserve in southern Nigeria that could produce 110,000 barrels of oil per day, beginning at the end of the decade. The announcement on Monday did not specify the amount being invested and came days after ExxonMobil's business in the country was acquired by energy company Seplat for \$1.2 billion.
