Sineng Electric's flagship 3.125MW central inverter solution has been deployed in this project. Tailored for 1500V PV plant, this inverter solution features advanced heat exchange technology ensuring no derating up to 50%, outdoor IP65 protection against harsh environments, high power density with small footprint and lower LCOE, and maximum ...

Sineng Electric showcased its utility-scale PV solutions as the centerpiece of Genera, creating a buzz in the atmosphere. The spotlight was on the 4.4MW central inverter, the EP-4400-HA-UD, featuring isolated internal control, higher power output, simplified O& M, and larger array capacity, which optimizes every touch point of the user journey.

This is not an uphill task for Sineng's central 3.125 MW inverter as it can run at full load for long periods due to its reliable and robust components selected through an advanced design process. In compliance with both IEC and CA standards, the 3.125 MW inverter also features an overload capacity of 115% for a longer period.
