Solar Charge Controller o Regulates the voltage and current coming from the PV panels going to battery and prevents battery overcharging and prolongs the battery life. 24. Inverter o Converts DC output of PV panels ...

18. How Solar Panels Work When silicon is stripped of all impurities, it makes a ideal neutral platform for the transmission of electrons. Silicon also has some atomic-level properties which make it even more attractive for the creation of solar panels. Silicon atoms have room for eight electrons in their outer bands, but only carry four in their natural state.
