

Slovenia solargaps ltd

What is SolarGaps?

SolarGaps is a company that has been on a mission to make energy free and accessible to all since 2015. They are pioneering a method of energy distribution that will power offices, homes, and cities of the future. By exploring innovative concepts and adopting new technologies, SolarGaps can help move every city closer to their Net Zero goals.

How do I use solargaps?

Simply plug-in SolarGaps and solar energy starts to power all devices in your home! It can even store power in your home battery storage solution. With SolarGaps, you make your own electricity.

Where can solargaps be installed?

Projected to be mounted in almost any type of building facades. Installed in the exterior, the buildings and offices will be protected by direct sunlight, and simultaneously produce enough energy to visibly reduce the cost of supplier energy consumption. Read our articles and be aware of all the details, applicabilities and advantages of SolarGaps!

What can solargaps do for You?

SolarGaps opens your window to free energy. We offer a simple Smart Blinds solution that automatically tracks the sun and generates electricity. Simply plug-in SolarGaps and solar energy starts to power all devices in your home! It can even store power in your home battery storage solution.

Why should you invest in solargaps?

Due to environmental problems like global warming, air pollution, acid rain, etc., many countries around the world provide loans, investments and tax deductions to provide a positive ecological impact on our planet. You can get reports from SolarGaps and control the blinds with your smartphone.

Sončni pretvornik ali fotovoltaični pretvornik pretvori enosmerno energijo v izmenično energijo za napajanje naprav, priključenih na omrežje. Sistem SolarGaps je povezan s svojim domačim električnim omrežjem ali s shranjevalnikom oz. akumulatorjem prek certificiranega mikro pretvornika, ki omogoča sončno energijo združljivo z njim.
