

Sm energy com U S Virgin Islands

Where is SM Energy located?

SM Energy operates in the Midland Basin in West Texas, the Maverick Basin in South Texas, and the Uinta Basin in northeast Utah. Our strategy is to focus on high quality, Lower 48 oil and natural gas producing assets, growing our inventory organically with top-tier economic drilling, completion, and production opportunities.

Does SM Energy have oil in the Uinta Basin?

SM Energy, with operations in the Eagle Ford and Midland basins in Texas, will now add the Uinta Basin to its portfolio, a region known for producing a distinct waxy crude oil. XCL Resources, backed by EnCap Investments and Rice Investment Group, is said to produce around 55,000 barrels of oil equivalent per day.

Who owns XCL Resources & SM Energy?

Credit: Calin Tatu/Shutterstock. US shale drilling companies SM Energy and Northern Oil and Gas (NOG) have reached an agreement to acquire oil and gas assets from XCL Resources for \$2.55bn. The deal involves Denver-based SM Energy taking an 80% interest in the assets for \$2.04bn, while Northern Oil and Gas will acquire the remaining 20% for \$510m.

What is SM Energy's company culture?

Our company culture drives our behavior, and we seek to build open, honest and transparent relationships with our stakeholders. We are a premier operator of top-tier assets. SM Energy operates in the Midland Basin in West Texas, the Maverick Basin in South Texas, and the Uinta Basin in northeast Utah.

Why should you choose SM Energy?

Oil and natural gas help to make everyday life possible. SM Energy contributes to making peoples' lives better by providing secure and affordable oil and gas to North America.

How much of the US Virgin Islands' electricity is generated by solar?

In 2020, about 20% of the US Virgin Islands' electricity was generated by renewables. Approximately 80% of this renewable capacity came from customer-installed, small rooftop solar panel systems, while the remaining 20% came from utility-scale solar energy facilities.
