

Why should Africa Invest in Israeli irrigation systems?

When possible, Innovation: Africa installs Israeli drip irrigation systems which generate more affordable and larger crop yields using less water, and provide a source of food and income for farmers and their families. Providing access to water enables villages to create new businesses and foster financial independence.

How can Africa support sustainable solar systems?

Funds to maintain the sustainable solar systems, such as the replacement of light bulbs and batteries, are generated by the village communities through Innovation: Africa's help establishing micro-businesses such as phone charging stations and barber shops that charge small fees.

Why did Yaari start bringing solar energy to African villages?

With a master's degree in International Energy Management and Policy from Columbia University, Yaari began bringing solar energy solutions to African villages, as she knew that energy was the key to breaking the cycle of poverty and enhancing living conditions throughout rural communities.

How do solar water pumps work in Africa?

Innovation: Africa installs solar-powered water pumps to access water from underground aquifers and bring clean water to taps installed throughout the village. Each solar water pumping system pumps an average of 30,000 liters of water per day and provides up to 10,000 people with clean water.

Is Innovation Africa accelerating the relationship between Uganda and Israel?

In 2019, Innovation: Africa won the Innovative Diplomacy Award from the Abba Eban Institute. Uganda's Prime Minister Ruhakana Rugunda described Innovation: Africa's work as having been a catalyst in accelerating the relationship between Uganda and Israel.

The spatially explicit results of figure 2 allow identification of hotspots of crop evapotranspiration needs and solar pumping infrastructure requirements: among those areas, large areas in West Africa (28 km³ yr⁻¹, 5.7 TWh yr⁻¹, and 14 million solar pumps), mostly over Nigeria and over the Sahelian strip; the northern part of Mozambique ...
